LiveVoice

AI Glossaries

What you need to know about glossaries for AI Translation and Closed Captions.

(AI) (Live Translation) (Guided Tours) (Silent Conferencing) (Admin)

Glossaries are a way to train the AI and therefore further improve the results of AI transcription and AI translation for your specific event.

Per glossary a maximum of 500 terms can be entered. Note, that translation glossaries are not available for all languages. Find the list here.

**Types of glossaries**

1. 1.
   Understanding: Transcription Glossaries
   Use this type of glossary to enhance the AI recognition of special words like company names.

2. 2.
   Translation: Translation Glossaries
   Use this type of glossary so the AI translates certain words exactly the way you want.
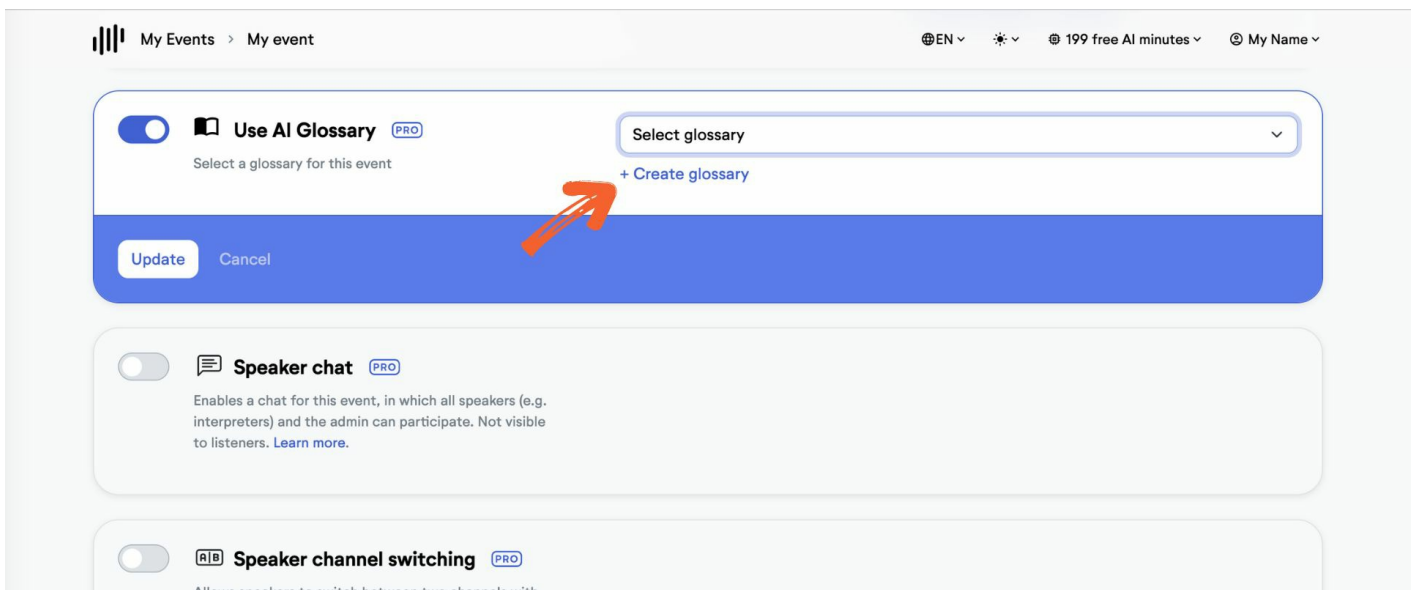

How to set up a glossary

Step 1:

Go to the settings tab of your event and activate the "Use AI Glossary" toggle.
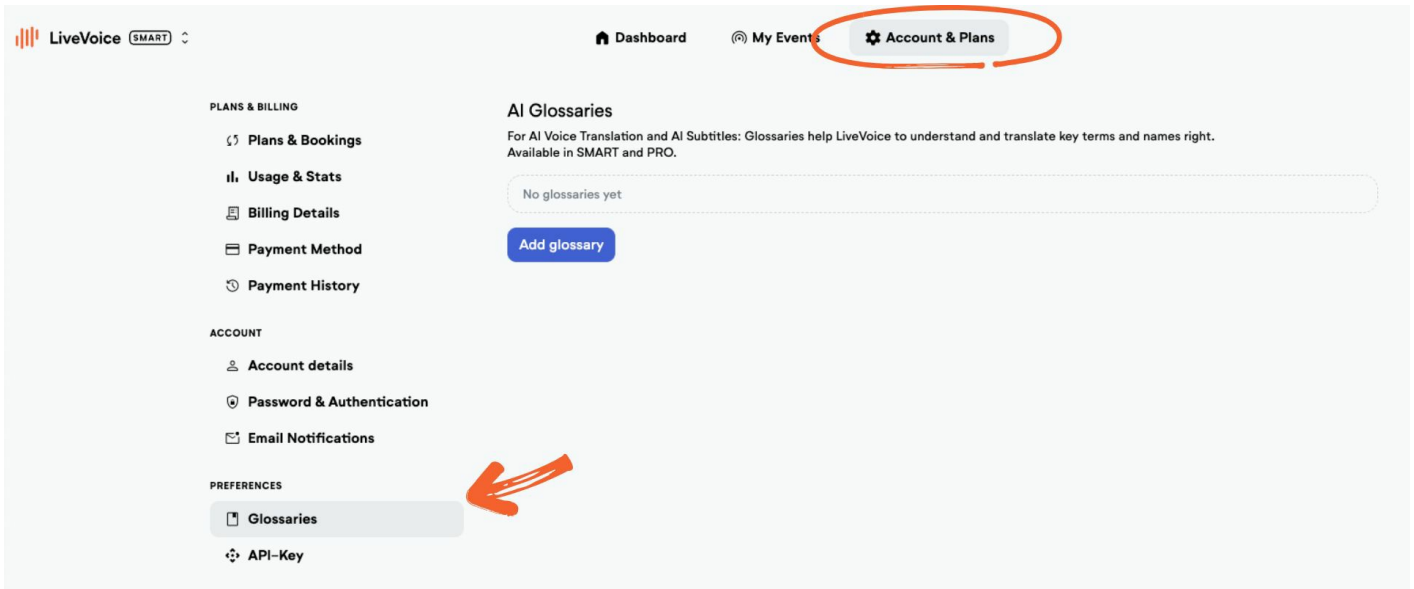

Step 2:

Choose "Create glossary" to create a new glossary.

Step 3:

Under your account settings you will now find the AI Glossaries of your account.

Click "Add glossary"

Step 4:

- Give your glossary a name.
- Add the types of sub-glossaries you want. You can add several *transcription* and *translation* glossaries.
- You can either enter words one by one or copy and paste your entire list.For your list, please use the following format: **source word >> translated word**. Use a **new line** for each pair.If you copy and paste two columns from Excel, Numbers, or Google Sheets, the format will be applied automatically.
- Click save.

Step 5:

Go back to your event to the event settings.

There you select the glossary you want to use for this event.

Hit "Update" and you are ready to go.
