

Integrations and compatibility with online event platforms

Learn about how you can use LiveVoice with various online event platforms.

[Integrations](#)[RSI](#)[Live Translation](#)[Admin](#)

LiveVoice works with basically any online event platform. With some of them there is even a direct integration available. With all other event platforms you can use LiveVoice as an interpretation tool simply alongside.

Integrations

These platforms already provide direct integration of LiveVoice:

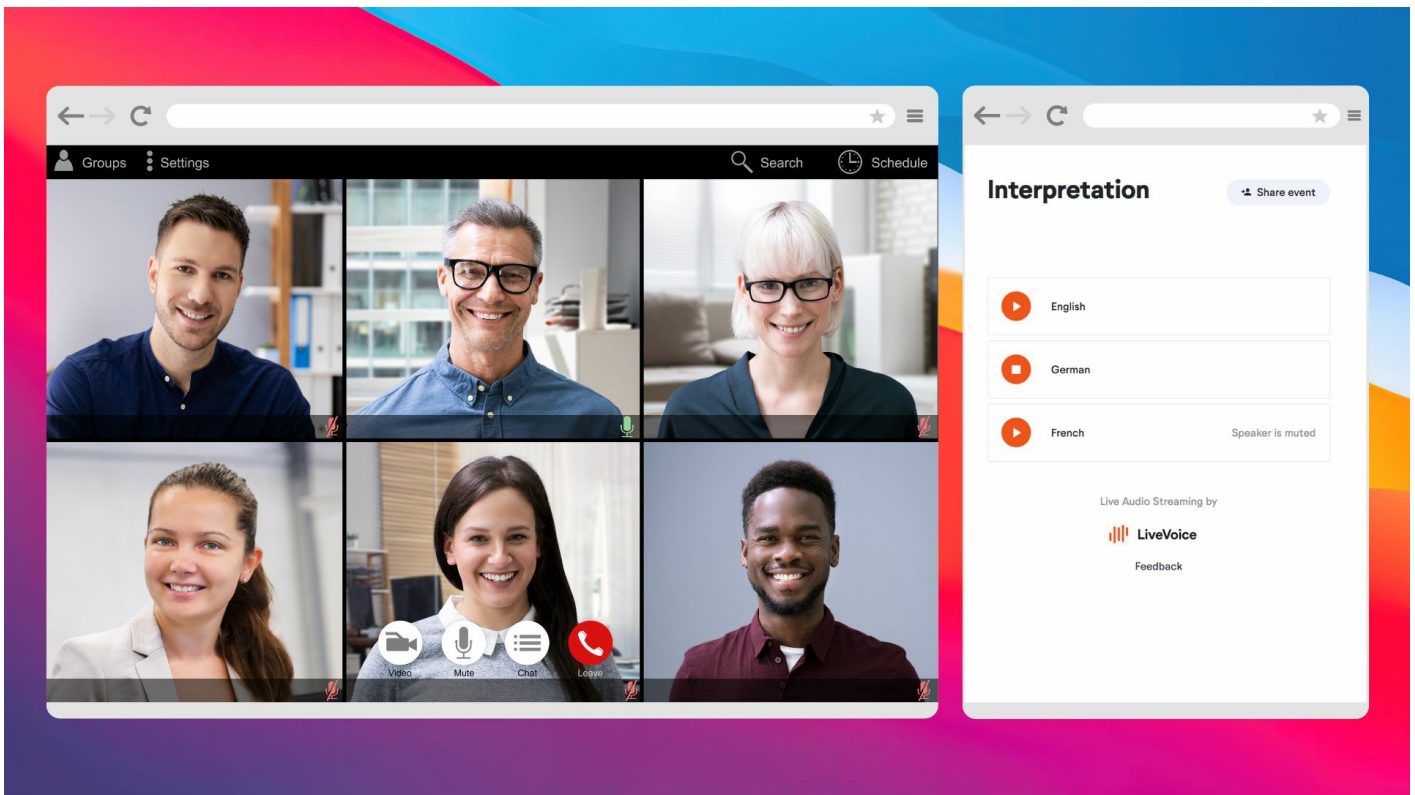

- [RingCentral Events \(Hopin\)](#) learn how it works [here](#)
- [Cvent](#) learn how it works [here](#)
- [Swapcard](#) learn how it works [here](#)
- [InterMedia Solutions](#) see how it works [here](#)
- [talque](#)
- [SCOCS](#)
- [Evey](#)

Works along-side

- MS Teams

- Cisco Webex
- Zoom
- BigMarker
- InEvent
- ON24
- EventsAir
- and many more

What attendees need to do:

1. Open LiveVoice in new browser window or on second device
2. Turn down volume of video stream in the event platform
3. Click play at language channel LiveVoice

You can let LiveVoice run in the background while watching the video in the online event platform of your choice.
