

Import audio from OBS

How to get audio from OBS to LiveVoice.

[Features](#)[Ingest audio](#)[Live Translation](#)[Admin](#)

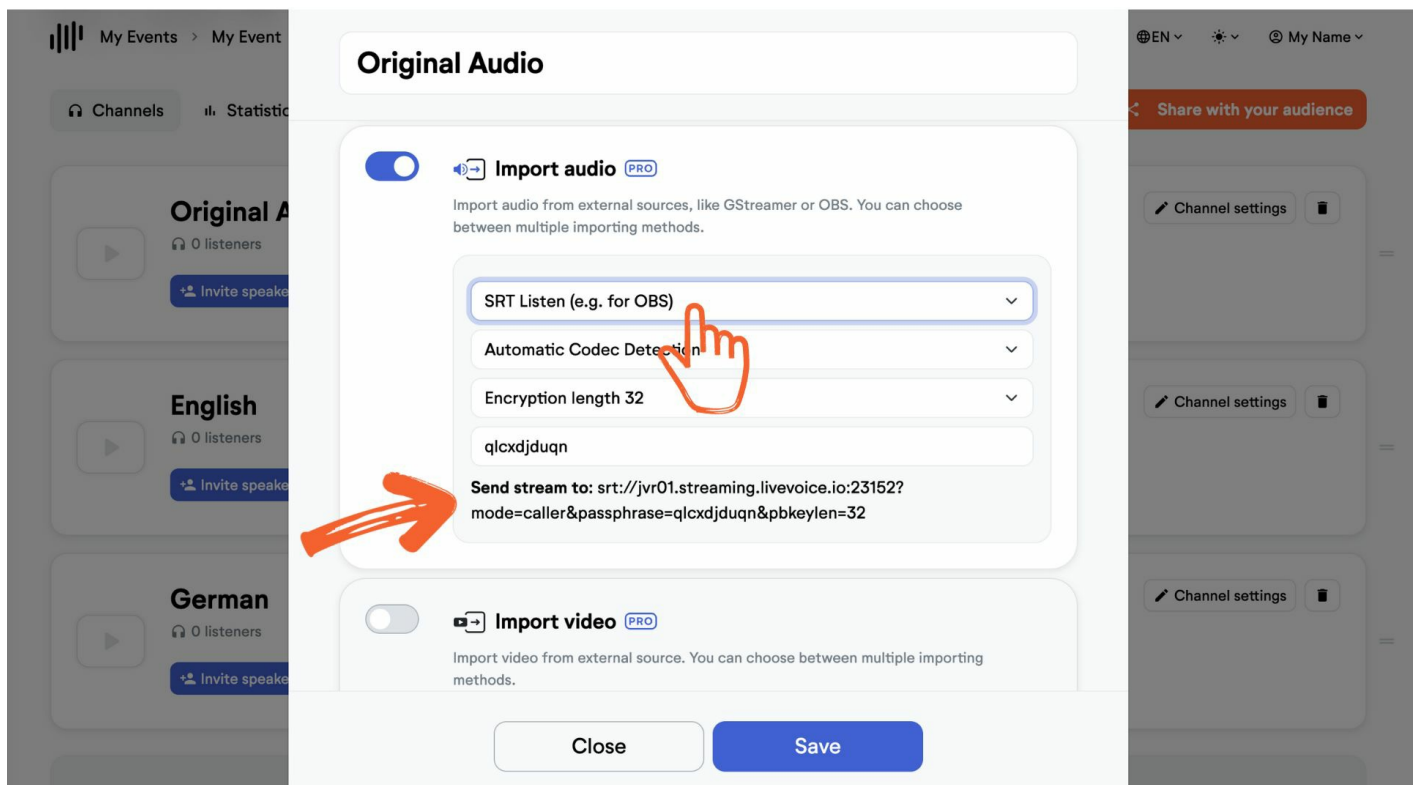

Available in: PRO

If you want to import audio from OBS to LiveVoice you can use the [import feature](#). Note that OBS adds a little delay to the stream, so the standard way of [ingesting via hardware](#) might be the better option when low latency is crucial in your use case.

Setup

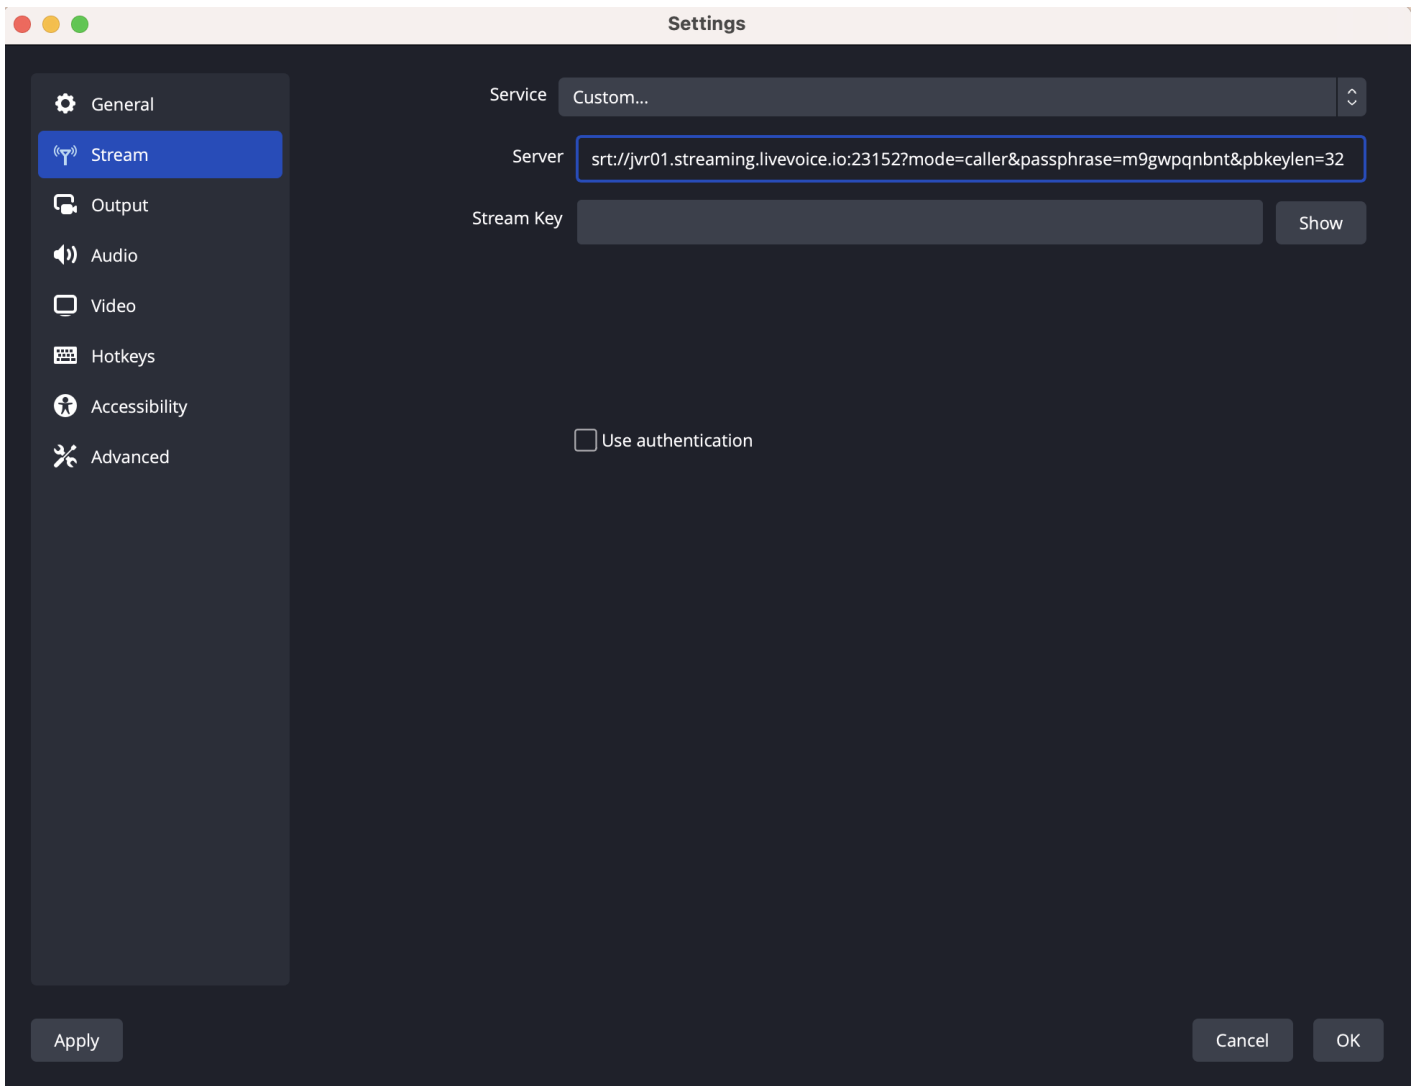

Step 1: Go to your LiveVoice event

1. Go to "Channel settings" of the channel you want to import to
2. Activate "Import audio"
3. Choose "SRT Listen" from the drop-down menu (all settings for OBS are already pre-set)
4. Copy the stream link that is generated below (starting with srt://...)

Step 2: Go to OBS

1.
Go to settings
2.
Go to "Stream"
3.
Choose Service "Custom..."
4.
Paste the server URL you copied from LiveVoice to "Server"
5.
Click OK

Step 3: Go back to your LiveVoice account

Click "Start importing"
