

# Relay function

How to do relay interpretation with LiveVoice.

[RSI](#)[Basics](#)[Features](#)[Live Translation](#)[Speaker](#)[Admin](#)

In some cases you might not have interpreters available that all understand the floor language spoken on stage. This is when you can do relay interpretation.

As a LiveVoice speaker you can simply listen to any other channel of an event. Click play on the channel you want to listen to, like floor language or other interpreters.
