LiveVoice

Test Event for Interpreters
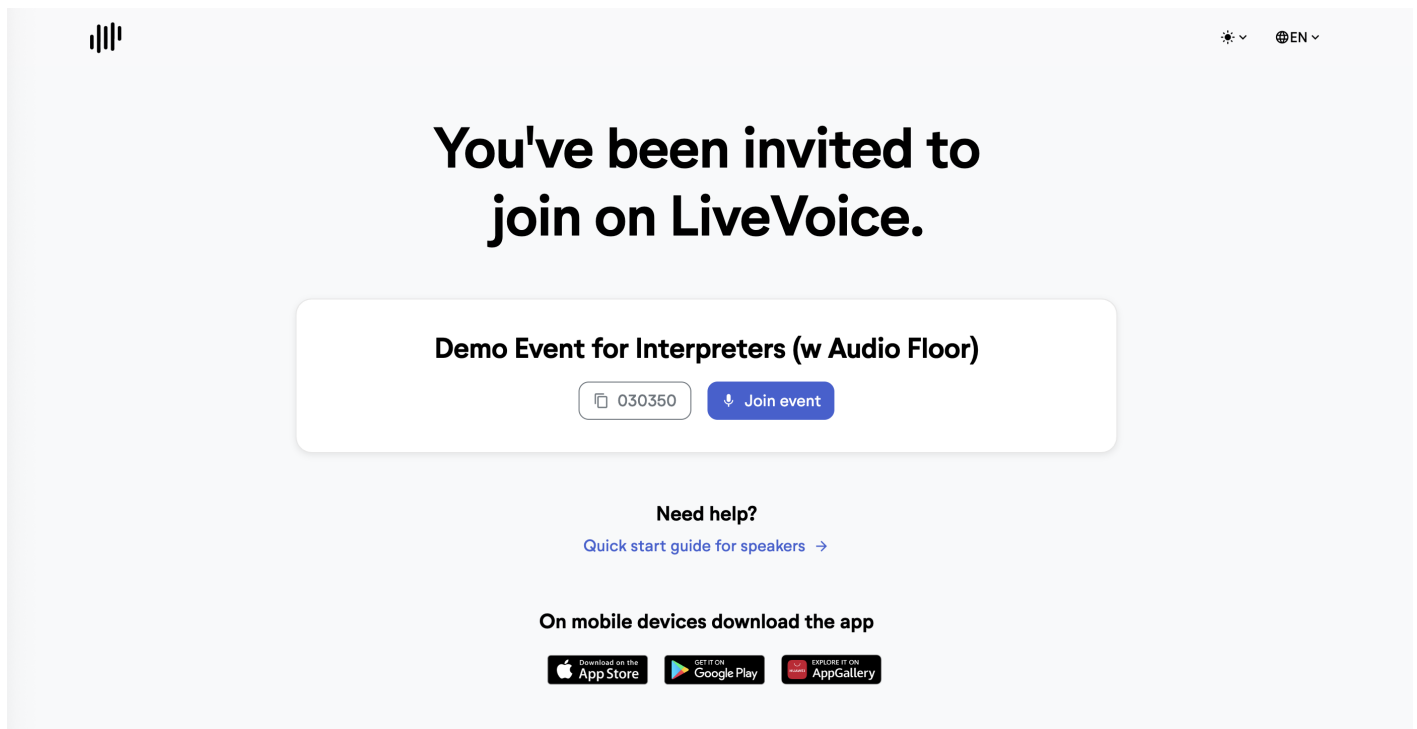

Use this test event to learn how to use LiveVoice as an interpreter.

(Useful tips) (Live Translation) (Speaker)

Step 1: Open this invite link in a web browser https://livevoice.io/speak/030350
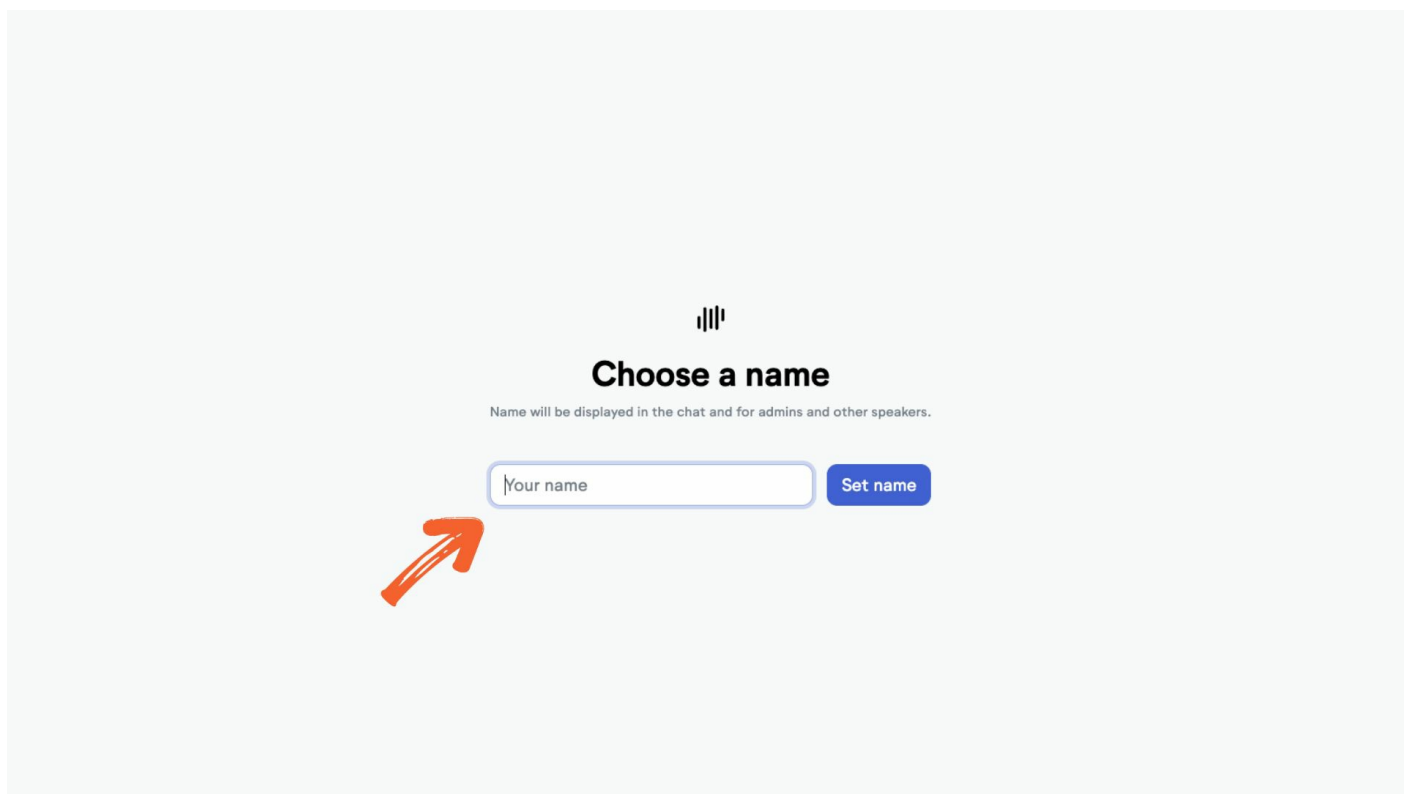

Recommended browser: Chrome.
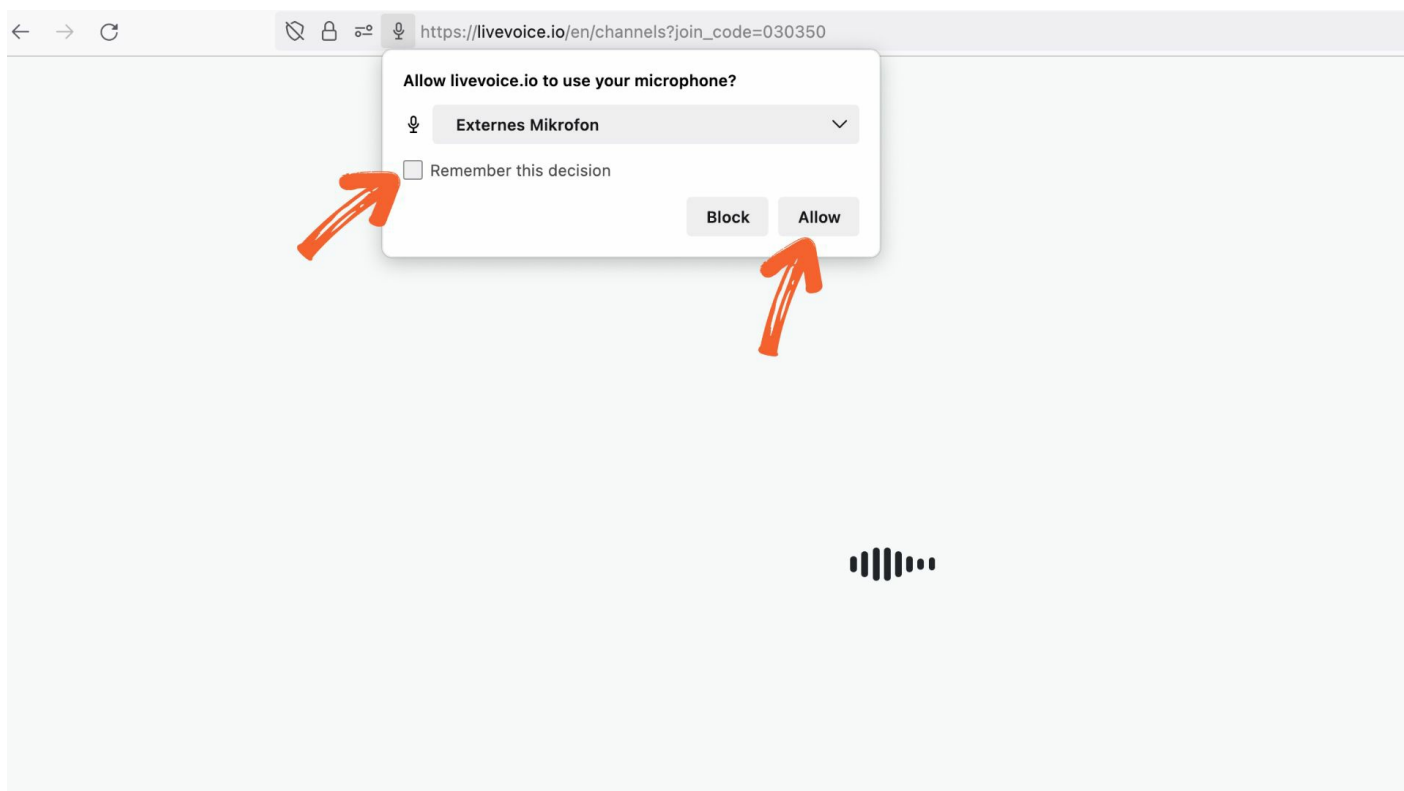

Step 2: Click "Join event"

Step 3: Enter your name

The name is only used for internal functions like the team chat. The audience will not see it. Provide a name that is useful for your interpreter colleagues and the event admin.
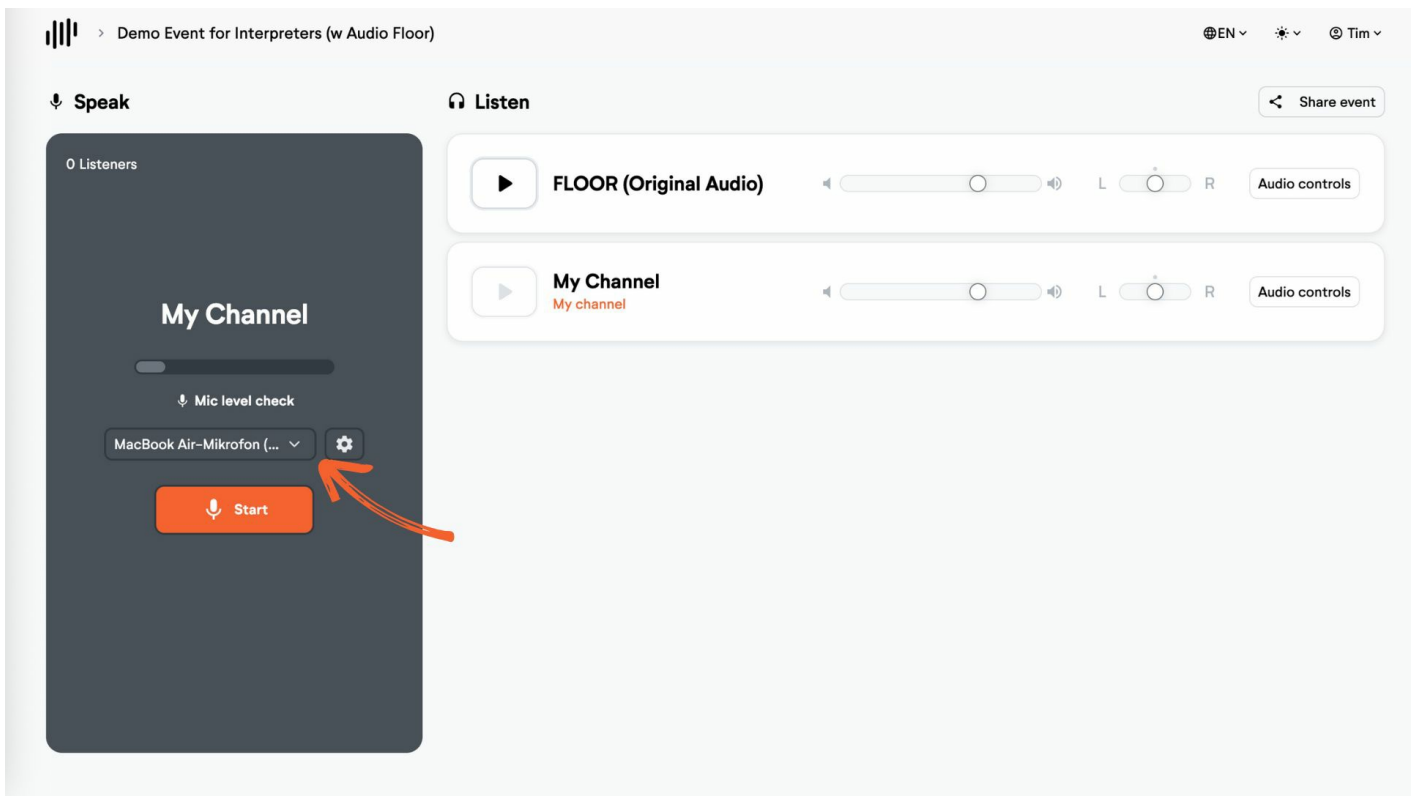

Choose a name

Name will be displayed in the chat and for admins and other speakers.

[Your name] [Set name]

Step 4: Allow microphone access

Check the "Remember" box and click "Allow"

https://**livevoice.io**/en/channels?join_code=030350

Allow livevoice.io to use your microphone?

🎤 **Externes Mikrofon** ⌄

☐ Remember this decision

[Block] [Allow]

## Step 5: Choose the right microphone input

On the left, you see your channel that you will speaking **into**. In the test event it is called "My channel". In the actual event, this will be the name of the language you are interpreting into.

Make sure your headset is selected as audio input in LiveVoice.

Step 6: Click Start

You are live now!

Step 7: Click Play at Floor channel

To listen to the Floor (original audio from stage) click play at Floor.

For this test event, there is an audio loop playing. At an actual event, you will hear the live audio from stage.

*Note:*For RSI there will also be a video displayed (which is not visible in this demo event).
