

# Export audio and video

Stream your LiveVoice audio or video to other platforms or systems.

[Features](#)[Live Translation](#)[Admin](#)

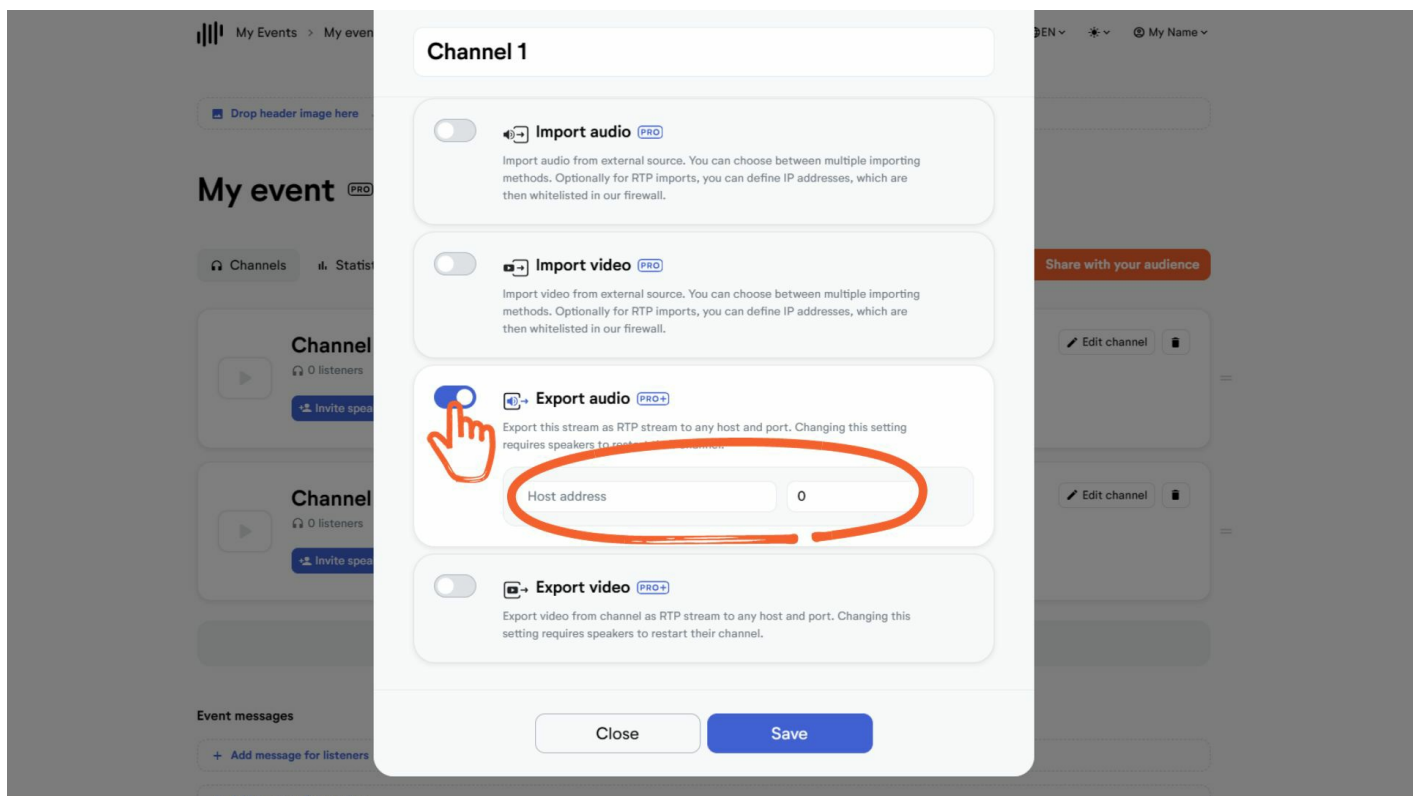

## PLUS feature

With Audio Export and Video Export you can stream any audio or video channel to an external location. To use this PLUS feature, please [get in contact](#) with us.

## Setup

**Audio:** Go to the channel you want to export from.

Enter URL and port to the location you want to export to. The format your receiving location needs to understand is RTP (OPUS).

**Video:** Go to the channel you want to export from.

Enter URL and port to the location you want to export to. The format your receiving location needs to understand is RTP (VP8).
