

Linked Events & Event groups

Link events together so participants can easily switch between events.

[Features](#)[Live Translation](#)[Guided Tours](#)[Silent Conferencing](#)[Audio Description](#)[Admin](#)

With event groups you can do two practical things:

1. 1.

Structure your events: If you have many events in your account, for example because you are organizing events for different clients, you can use event groups to keep a nice overview of all events.

2. 2.

Link events for your participants: If you have for example a large event with multiple stages, you can create one event for each stage and then link them. In this way **users can easily switch between events** without having to scan another QR code.

Setup

1. 1.

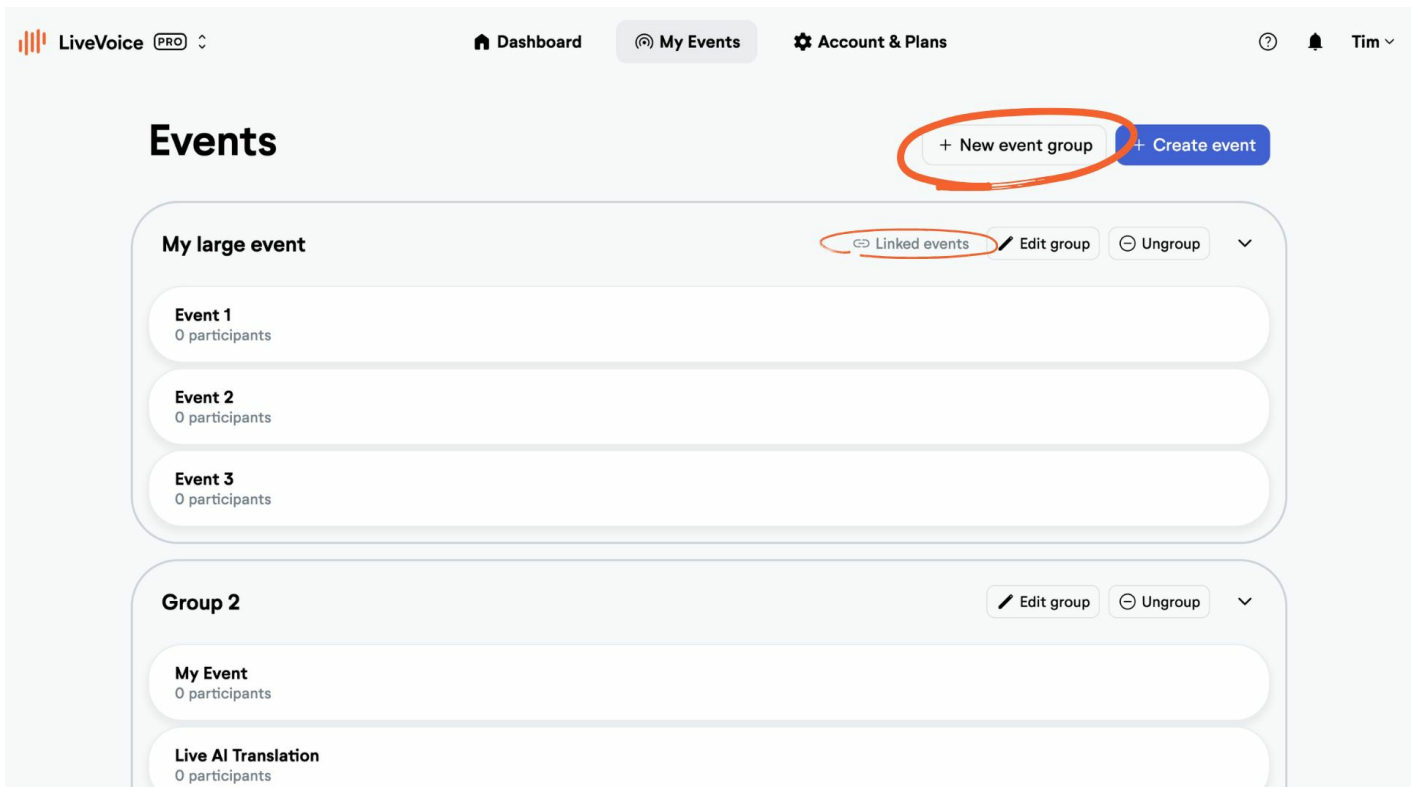

On your events overview click on "New event group".

2. 2.

Drag and drop all events into this group as needed.

3. 3.

Activate the "Link events" toggle if you want the events to be shown as linked for participants.

The screenshot displays the LiveVoice user interface for managing events. At the top, there's a navigation bar with 'Dashboard', 'My Events', and 'Account & Plans'. The main heading is 'Events'. Below this, there are two buttons: '+ New event group' (circled in red) and '+ Create event'. The interface shows two event groups. The first group, 'My large event', contains three sub-events: 'Event 1', 'Event 2', and 'Event 3', each with '0 participants'. A 'Linked events' toggle is visible and circled in red. The second group, 'Group 2', contains two sub-events: 'My Event' and 'Live AI Translation', each with '0 participants'.

You can ungroup events any time.
