

Participants password

Protect access to your event with an additional password for participants.

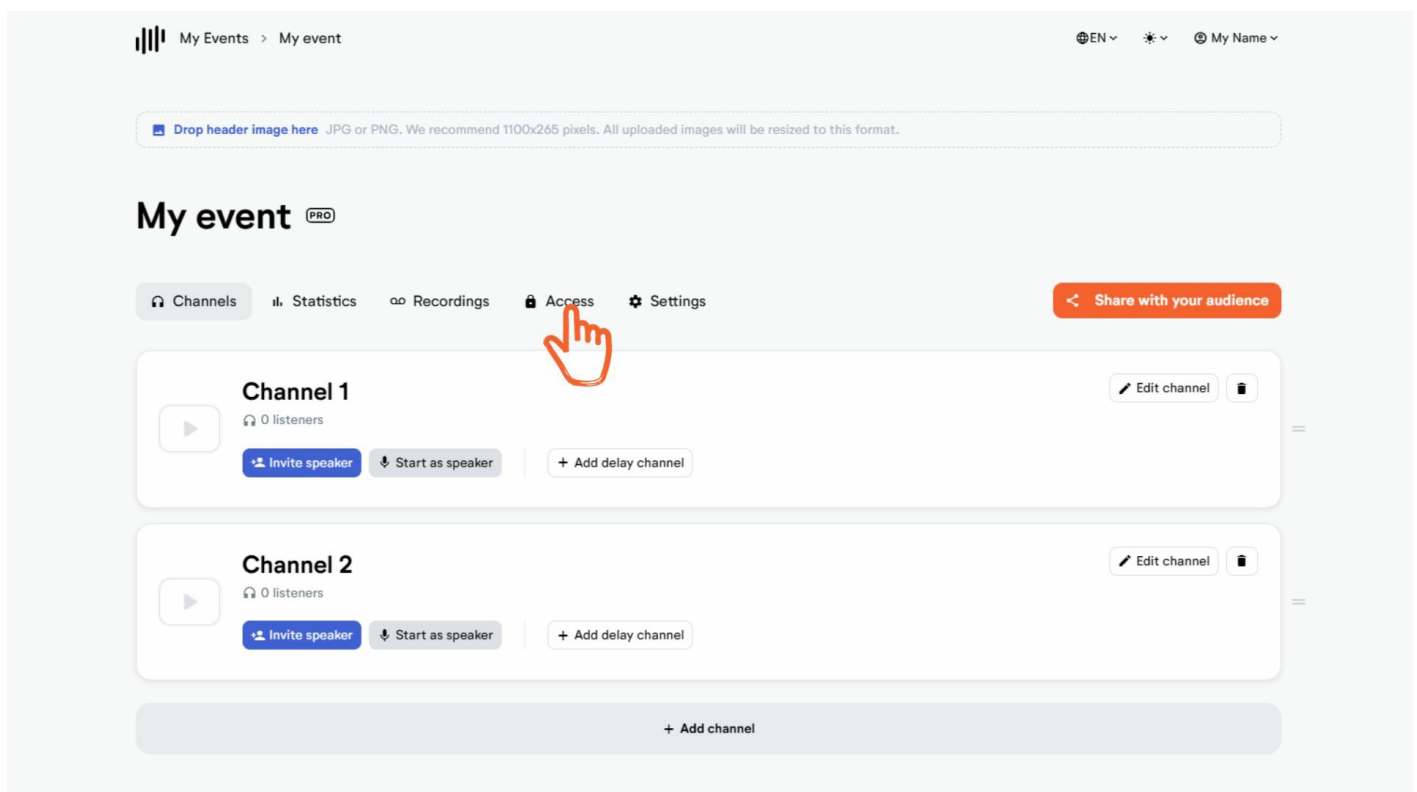

[Features](#)[Live Translation](#)[Guided Tours](#)[Silent Conferencing](#)[Audio Description](#)[Admin](#)

Available in: *LIGHT, SMART, PRO*

In some cases, you may want to add an extra layer of security to your event. This is why you can optionally add a password for participants which they have to enter additionally to the 6-digit code or link.

Setup

1: In your admin account go to the "Access" tab of your event.

2: Create password for event participants.

My Events > My event

☐ **Discoverable via geo location**

Activate this feature if you want to make your event visible to LiveVoice users at a certain location. People within a set radius will then be able to join your event without needing the listener code.

☒ **Listener password**

If listener password is activated, any listener of this event needs to enter this additional password to be able to join. You may use this as an additional security measure if needed.

Password

Update Cancel

☐ **Speaker password**

If the speaker password feature is activated, any speaker of this event (e.g. interpreters) needs to enter this additional password to be able to join.

Now, if someone wants to join your event, he will be asked to enter the password.

With a SMART or PRO account you can also set a [password for speakers](#).

With a PRO account you can even provide [individual access codes](#).
