

How to: Setup for guided tours

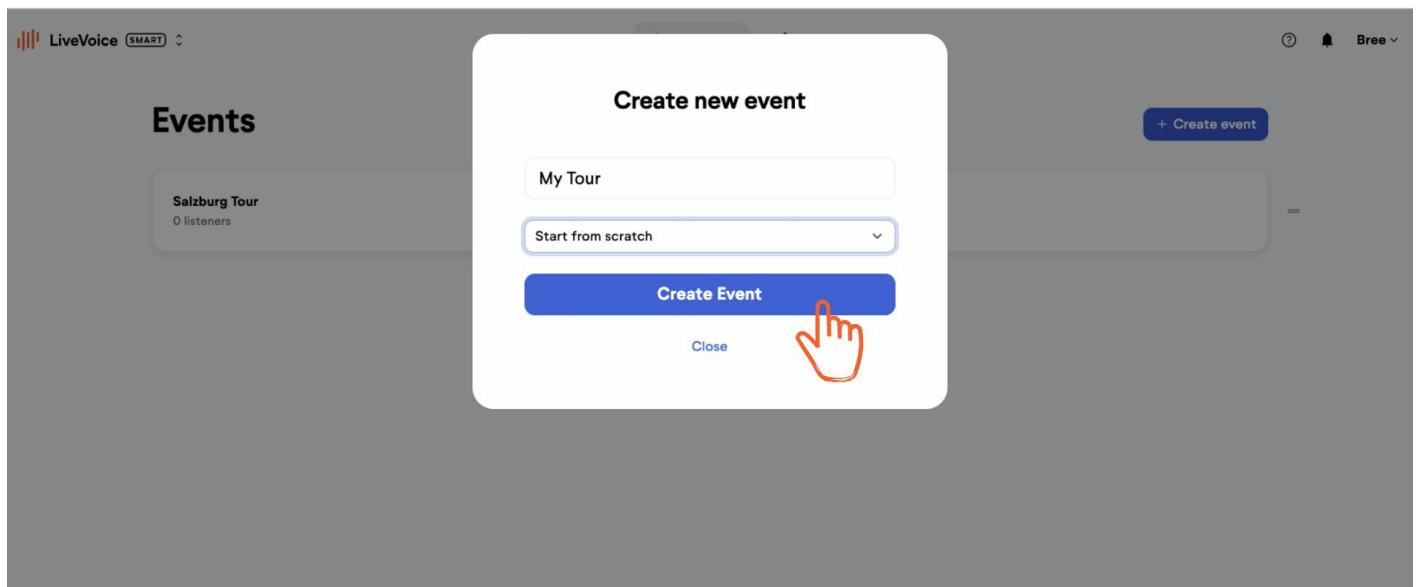

Step-by-step instructions for setting up a guided tour in LiveVoice.

[Basics](#)[Guided Tours](#)[Admin](#)

With LiveVoice tour guides and guests only need their smartphones. It works via mobile internet, so you can go wherever you want. Learn here how to prepare and set up a guided tour with LiveVoice.

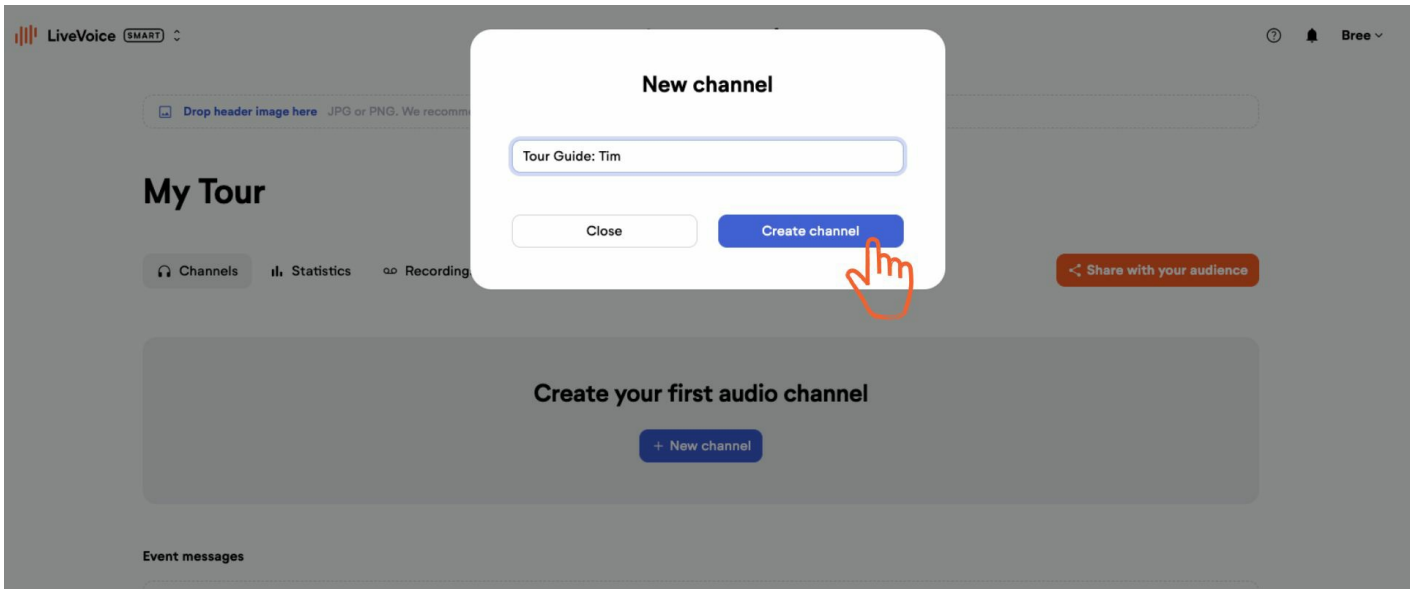

Step 1: Create event

In LiveVoice you always start with creating an "event", no matter what occasion you are using it for. So in the case of guided tours, "event" can refer to "tour".

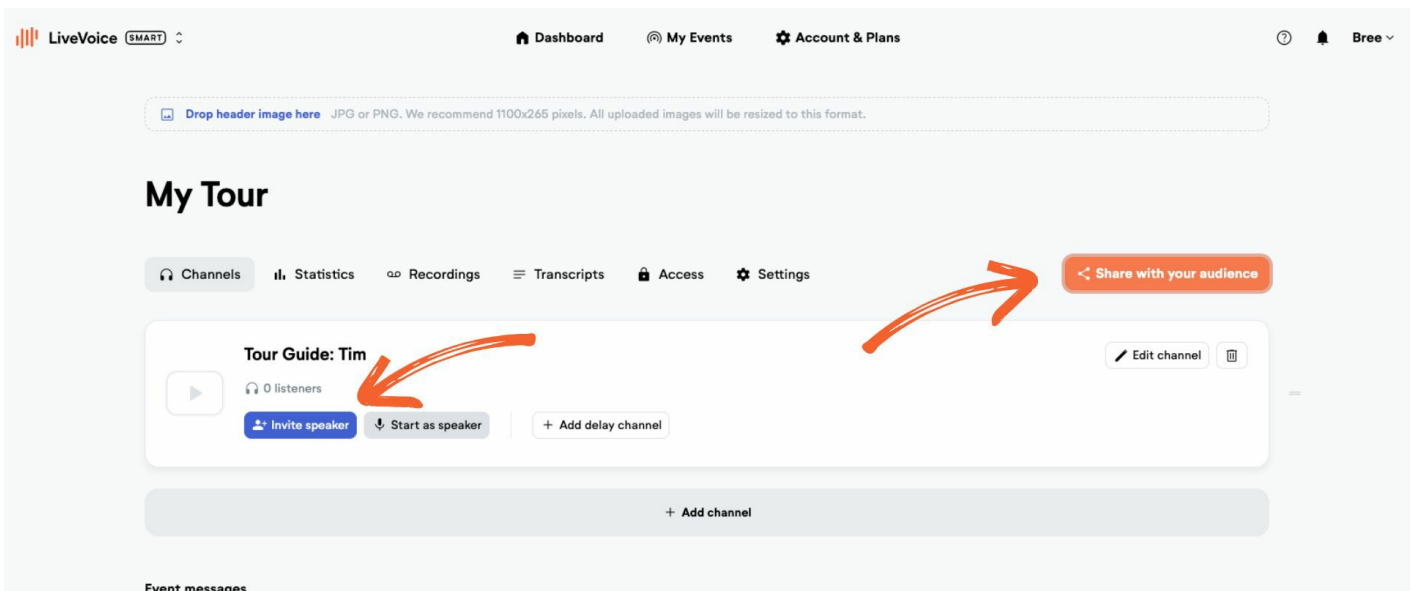

Step 2: Create a channel

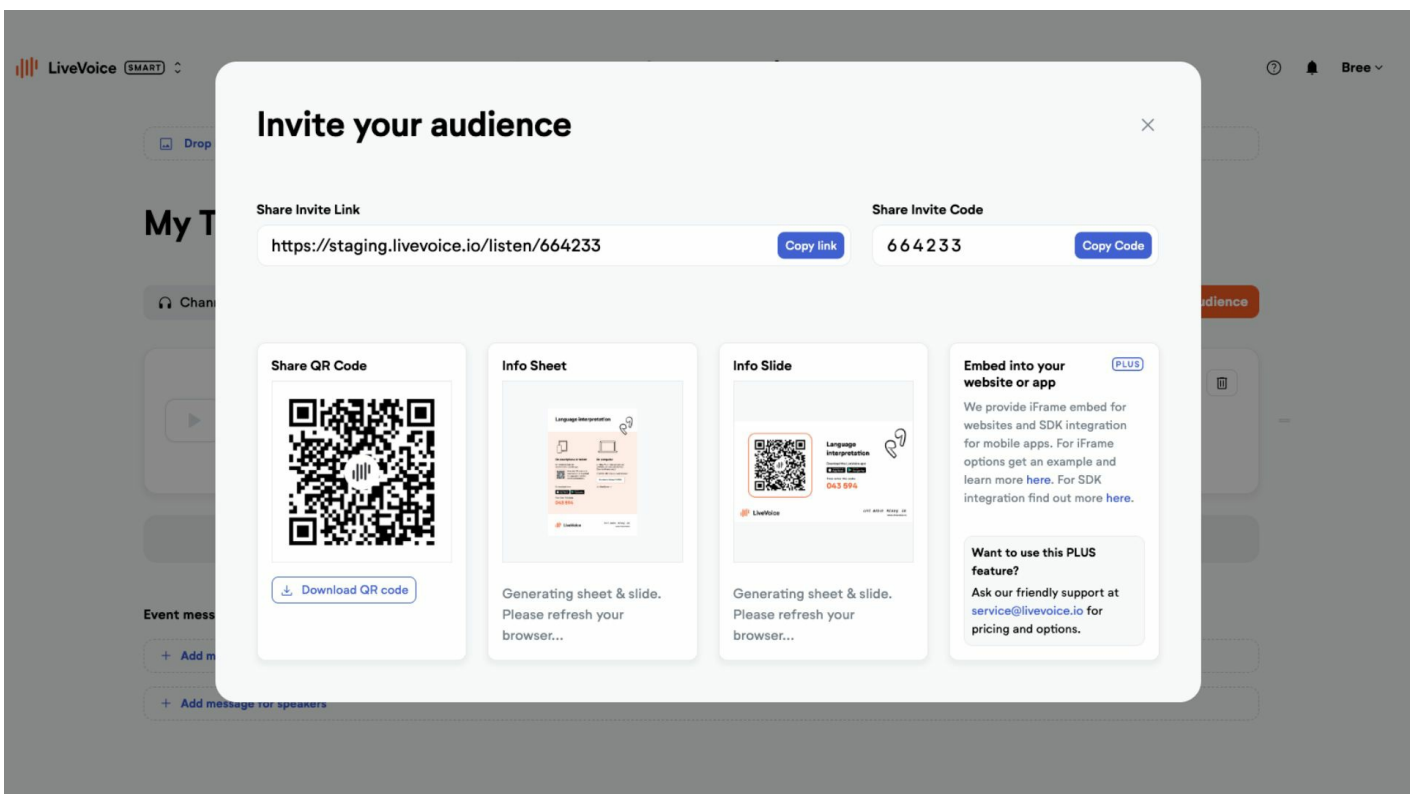

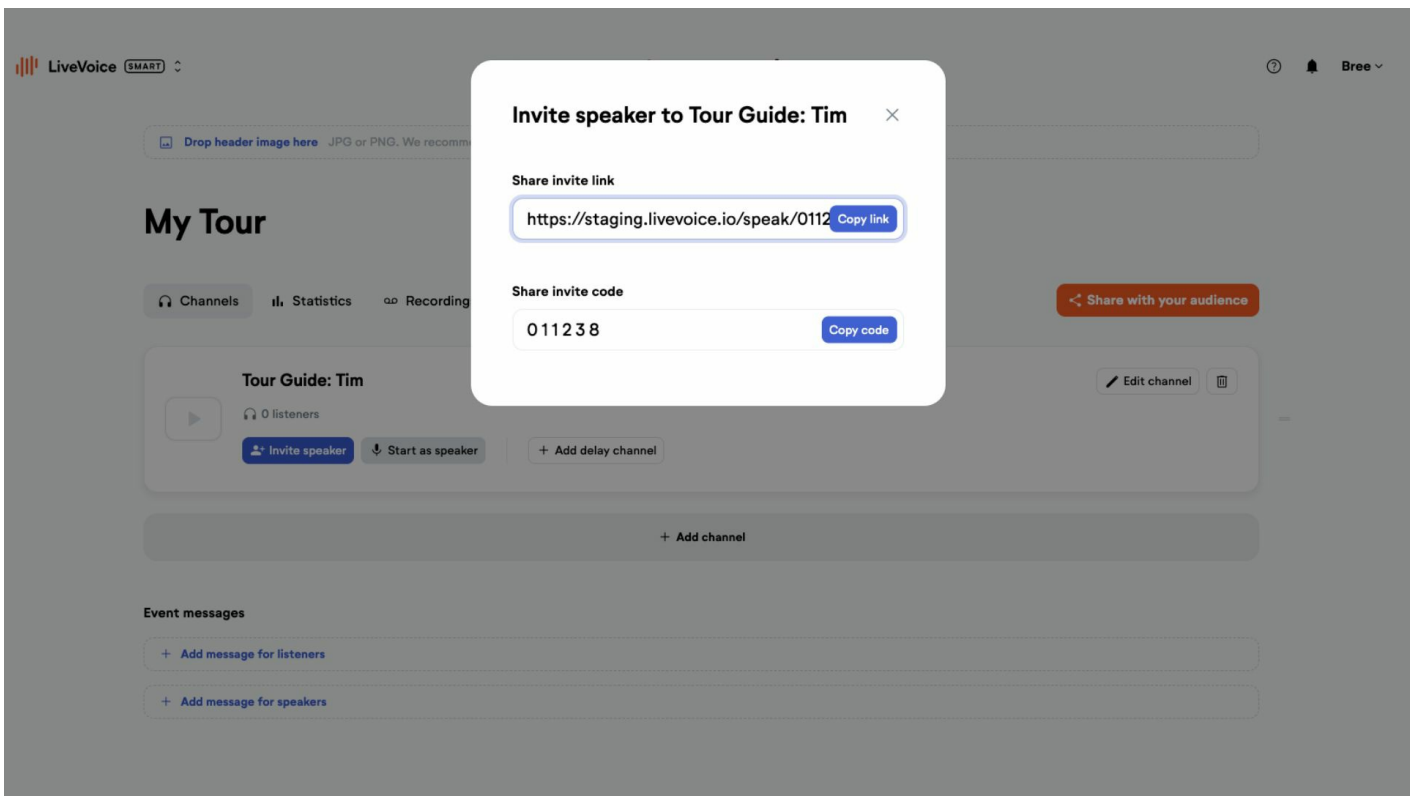

Give the channel a name, for example you can name it after the guide.

Step 3: Share with guests and tour guide

- Click "Share with your audience" to get the invite options for the guests.
- Click "Invite speaker" to get the invite options for the tour guide.

Option: Add live AI translation

Easily add AI translation into different languages so you can provide your tour to people in different languages with only one guide. [Learn more here.](#)

Good to know

If you want to provide several different tours, you can either create several channels or you can create several

events with only one channel within. Either one works, it depends on your preferences and if you want to share the same QR code or different ones.
