LiveVoice

Speaker password

Protect access to your channels with speaker passwords.

Features | Live Translation | Guided Tours | Silent Conferencing | Audio Description | Admin

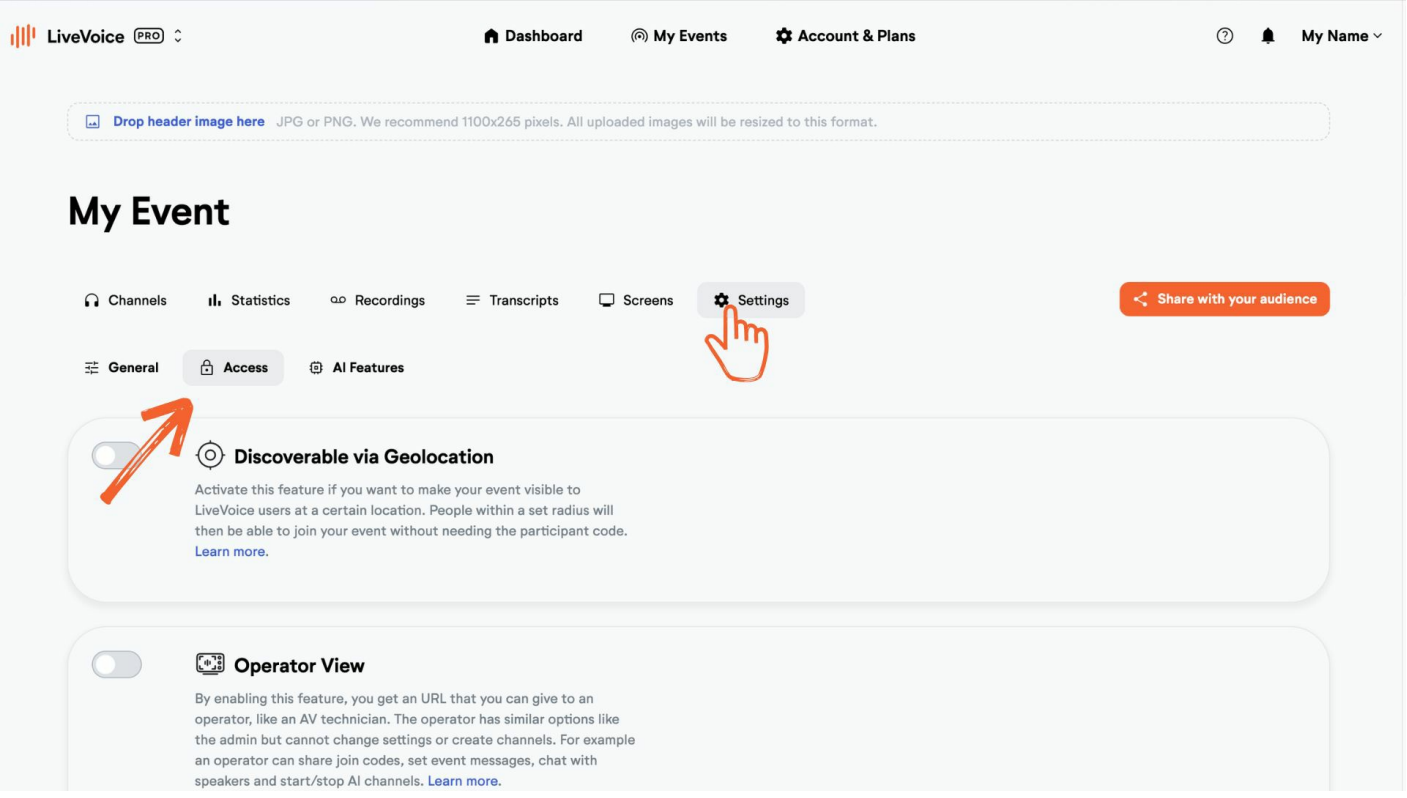
Available in: SMART, PRO

Use this feature to add an extra layer of security to your event, to make sure only someone having the right password can start streaming on your event channels.

If you set a speaker password, all speakers will have to enter this password once before joining.

Setup

1: In your admin account "Settings" go to the "Access" tab of your event.



2: Create password for speakers.

Account & Plans
My Name
Operator View
By enabling this feature, you get an URL that you can give to an operator, like an AV technician. The operator has similar options like the admin but cannot change settings or create channels. For example an operator can share join codes, set event messages, chat with speakers and start/stop AI channels. Learn more.
Participants password
If participant password is activated, any participant of this event needs to enter this additional password to be able to join. You may use this as an additional security measure if needed. Learn more.
Speaker password
If the speaker password feature is activated, any speaker of this event (e.g. interpreters) needs to enter this additional password to be able to join. Learn more.
